

# Kate Phipps Jewellery

BEAUTIFULLY HANDMADE CONTEMPORARY JEWELLERY

## INSTRUCTIONS

Print at 100% on an A4 piece of paper.

Measure the line below. It must be **exactly** 5cm.

Place your existing ring over the top of the circles. The circle that can only just be seen inside the ring you're measuring is the closest size. If you move the ring slightly and part of the circle is no longer visible, that's a good sign that you've got the closest size.

Rings that don't sit flat on the paper (e.g. engagement rings) and those that have been squashed during wearing will be difficult to size using this method.

This is designed to give a rough idea only and is not possible for it to be as accurate as me physically measuring your existing ring. If you are unsure, please send me a photo of your ring on top of this piece of paper. The photo will need to be taken directly over the top of the paper with your ring resting on one of the circles.

5cm
